### BUSHLESS MOTOR

Makita® Brushless Motor is precision engineered to be more efficient than a comparable model. It reduces maintenance, provides longer run time and faster charging.

### AUTOMATIC TORQUE DRIVE TECHNOLOGY

Automatic torque Drive Technology adjusts speed and torque for optimal performance, even in the most demanding applications.

### EXTREME PROTECTION TECHNOLOGY

Makita® Extreme Protection Technology (XPT™) is a series of protective seals inside the tool engineered to channel water, dust, and debris away from the tool's key internal components, providing durability and longer tool life.

### ACTIVE FEEDBACK SENSING TECHNOLOGY

Smart function to minimise the effect of kick-back. Active Feedback sensing Technology® uses an on-board accelerometer to measure rotation and electronically turns off the motor if rotation is suddenly forced to stop.
